**Have you any data to report in this period ?** Yes

**1.1 Overall conclusion on the level of compliance achieved**

In the year 2023, the number of controls in the food sector increased compared to those performed in 2022. Planning and priorities of the official controls, were based in a risk analysis and also, care was taken to prevent fraudulent practices and fraud. It is pointed out, however, the significant reduction of human resources of the Competent Authorities at regional-local level over time and the difficulty of their response to the multiple responsibilities with which they are responsible. Nevertheless, the effort has been intensified for their more rational management with proportional coverage of companies in all stages of production, processing and distribution of food. The compliance rate of food businesses remained stable compared to previous years, with a total compliance of 96,8%. The infringements mainly concern general hygiene issues related to deviations in the operating procedures, labelling issues of application of self-control systems and others (traceability issues, approval procedure etc) . Laboratory testing of biological and chemical risk factors as well as quality parameters showed non-compliance rates, reduced compared to previous year, with a total non-compliance of 3,9%.
